Walkstool Comfort 65 XXL

Walkstool Comfort 65 XXL Weight 850 g Max 250 kg Height 65 cm, width 40 cm Made in Sweden

DESCRIPTION

Walkstool Comfort 65 XXL

Telescopic, lightweight, ventilated seat and wide feet (does not sink easily)

Here is the seat that walks. The seat that follows you everywhere you go without being too bulky since it fits in a bag. Unfolds with a simple twist of the hand. Pull the legs out and open. It remains stable everywhere. You will feel comfortably seated during a full match or concert, or even while fishing or in an endless queue.

And at work! Ask those who are often forced to work in a squatting position. Walkstool takes care of your back, knees, and joints. Many people can confirm this. Two seating positions. Adjust according to your needs. A perfect gift. Starting with yourself.

- **Lightweight** – aluminum construction.
- **Portable** – telescopic with carrying bag.
- **Durable** – high quality and high load capacity.
- **Comfortable** – ergonomic and wide ventilated seat.

- **Multi-purpose** – from professional to outdoor leisure activities.
- **Unique** – the only telescopic three-legged seat in the world with a patent and copyright protections.

Walkstool comes in several heights and seat widths. It is possible to sit on the Walkstool without deploying the telescopic legs. Perfect for low working positions. Try it!

Walkstool is a Swedish invention and the only stool in the world with three telescopic legs, patents, and trademark protections. Walkstool is lightweight, compact, and offers superior seating comfort.

1. When deploying the telescopic legs to achieve a normal seating height, always ensure to correctly position the red locking button and make sure it is visible.
2. To carry the chair, slide the belt through the loop or insert the strap into the loop of your pants, then secure it with the snap button.
3. When cleaning, press the red button, pull out the leg, and rinse with water.
