DESCRIPTION

Planetary 58° UWA 4mm

High-performance eyepiece

The Planetary 58° UWA 4mm eyepiece from Sky-Watcher is ideal for high magnification use when observing planets.
Based on a modified design of Plossl eyepieces, this eyepiece is multi-coated and constructed with five lens elements. Characterized by a wide field of view of 58 degrees, with low distortion, offering high contrast and comfortable use.

This eyepiece also benefits from a 16mm eye relief, making observation easier for glasses wearers.
