Availability	**Available in Geneva**
Item ref. (SKU)	10245

The Heritage-100P is a compact, lightweight, and portable instrument. With its quality 100 mm f/4 parabolic optics, it can be used to observe the Moon and planets, as well as for observing star clusters, bright galaxies, and nebulae. In a nutshell Compact and portable Parabolic mirror Ø 100 mm Azimuth mount

DESCRIPTION

Heritage-100P

The telescope optics:

The compact Sky-Watcher Newton Heritage-100P is a lightweight and portable telescope that you can take anywhere. The high-quality 100mm f/4 parabolic optics are well-suited for observing the Moon, the brightest planets, as well as star clusters, bright galaxies, and nebulae.

The telescope mount:

The removable telescope tube rests on an easy-to-use single-arm Dobson mount. A 3/8" photo thread at the base of the mount allows it to be mounted on a tripod.

Contents of delivery:
