ZEISS cleaning products. The optimal care for optical surfaces. Fingerprints, grains of sand, or dust deposits: the quality of the image is directly related to the cleanliness of the optics.

DESCRIPTION

ZEISS Lens Cleaning Kit Products

The optimal care for optical surfaces

Fingerprints, grains of sand, or dust deposits: the quality of the image is directly related to the cleanliness of the optics. That’s why it’s essential to maintain the optics at all costs.

ZEISS offers you professional maintenance products that perfectly complement the unique aspect of your optics. Our specialists have developed these products to meet the precise needs of high-end optical surfaces.

Protective and effective

With ZEISS maintenance products, you gently remove even the smallest dirt, but effectively. They are not only reserved for objectives, filters, and prescription glasses but can also be used very well for binoculars and LCD screens, such as on your computer or smartphone.

ZEISS Lens Cleaning Kit
