LEICA ULTRAVID HD-PLUS. Brightness and excellent mechanical performance.

DESCRIPTION

The Leica Ultravid 32 HD-Plus models stand out for their compact volumes, very high optical performance, and simplified focusing system. The 8x32 HD Plus model is the ideal companion for long hikes or naturalist observations in challenging terrain. When discovering architectural monuments, its very wide field of view ensures the visual control needed for observing elements at short distances. With magnifications of 8 or 10 times, the models with 32mm objectives are perfectly suited for daytime use. The 10x magnification allows for precise observation of the smallest details, even at long distances. Meanwhile, the 8x magnification offers a wider field of view.

FOR BREATHTAKING OBSERVATIONS

INNOVATIVE AQUADURA® COATING

Protects optical systems from water, dirt, and damage

The AquaDura® coating developed by Leica ensures crystal-clear visibility in all weather conditions while protecting the lenses from scratches and abrasion. Water droplets simply slide off the lenses. Dirt and fingerprints can be easily removed.

NATURALLY ROBUST

Ready for anything in any situation

Rue du Perron 17
1204 Genève
022 311 47 75

The timeless and elegant design protects its contents: precision mechanics and optical finesse. Tested in the harshest conditions, the Ultravid HD binoculars are designed to be reliable partners.

CRYSTAL CLEAR VISIBILITY

Experience nature in every detail

The Leica Ultravid HD range is a concentrate of modern technology, new treatment processes, innovative glasses, and the highest optical expertise.

TECHNICAL SPECIFICATIONS

Magnification	**8x**
Diameter	**32 mm**
Brightness	**4 lg**
Field of view at 1000 meters	**135 m**
Minimum focus	**2.1 m**
Eyepiece relief	**13.3 mm**
Pupil distance (mm)	**52-74 mm**
Height & width	**116x116**
Weight	**535 g**
