LEICA ULTRAVID HD-PLUS. Brightness and mechanical performance of excellence.

DESCRIPTION

Leica Ultravid 50 HD-Plus

The Leica Ultravid 50 HD-Plus binoculars offer remarkable contrast and brightness values that binoculars with larger objectives struggle to achieve. The fluoride-coated lenses ensure optimal quality and image definition. Due to their very large objectives, they are ideal for twilight and night observations. The Leica Ultravid 50 HD-Plus are available in 8x, 10x, and 12x magnifications.

The 8x50 HD-Plus provide an optimal compromise between high transmission and perfect contrast, making them true night binoculars.
The 10x50 HD-Plus offer significant magnification allowing for good detail observation while ensuring unique performance in low light due to their very generous exit pupil.
The 12x magnification is best suited for very detailed observation, as these instruments are ideally used with a tripod.

BREATHTAKING OBSERVATIONS

INNOVATIVE AQUADURA® COATING

Protects optical systems from water, dirt, and damage

The AquaDura® coating developed by Leica guarantees crystal-clear visibility in all weather while protecting the lenses from scratches and abrasion. Water droplets simply slide off the lenses. Dirt and
