As leaders in optical performance and ergonomics, the optical features of the KITE LYNX HD+ range are truly unique and the result of cutting-edge engineering.

DESCRIPTION

BEYOND LIMITS, BEYOND TRADITIONS - Lynx HD+

As leaders in optical performance and ergonomics, the optical features of the KITE LYNX HD+ range are truly unique and the result of cutting-edge engineering. This instrument is designed to provide perfectly natural color rendition and a wide-angle observation that no other pair of binoculars can match.

This exceptional wide-angle vision will allow you to make faster observations and identifications, as well as improve observation comfort and image quality.

Thanks to the revolutionary optical system created by Kite optics, the LYNX HD+ range is designed to be adaptable to all conditions. This instrument surpasses the limits of any other pair of binoculars and gives you a huge advantage for observation at both long and short distances. You will see faster at long distances thanks to its extra-wide field of view, but you will also observe an increased amount of detail when observing at shorter distances or in denser areas, such as forests or enclosed environments. You will therefore have a quicker view and a better consideration of details.

The LYNX HD+ is truly amazing because, despite all its optical technology, it is among the smallest and lightest binoculars ever made. The LYNX HD+ 30mm class is so compact that it fits into the pocket of your

vest. The LYNX HD+ 50mm class, designed for optimal brightness performance, is neither larger nor heavier than most 42mm binoculars on the market, and offers an equally wide field of view. For the first time, you can enjoy the brightness achieved with large diameter binoculars without the traditional drawbacks such as weight, size, and a reduced field of view.

The LYNX HD+ truly transcends limits and even traditions.

- Extra wide field of view
- Ultra lightweight
- Ultra compact
- Neutral color rendition
- HD optical system
- KITE PERMAVISION (external lens coating for better water and dirt resistance)
- KITE PERMARESIST (improved scratch resistance)
- Removable and replaceable aluminum eyecups
- KITE MHR Advance + coating
- Fully waterproof and nitrogen-filled
- Delivered with strap, case, and lens covers

CONCEPT-TERRAIN

Preparation of your binoculars

Before each delivery, your binoculars undergo a **complete optical and mechanical check** by us — to guarantee you a perfectly adjusted instrument, ready to use from the first use.

To perfect your experience in the field, we add a selection of **essential accessories for free:**

- Attachment of the strap — **Smart-O'Strap®** system
- Attachment of the **comfort connector** for the eyepiece cover
- Attachment of our **anti-slip system** for the lens covers — an exclusive innovation

TECHNICAL SPECIFICATIONS

Magnification	8x
Diameter	30 mm
Light transmission	89.5%

Brightness	3.75 lg
Field of view at 1000 meters	151 m
Minimum focus	1.35 m
Eyepiece relief	15 mm
Pupil distance (mm)	73-55 mm
Height & width	114x115 mm
Weight	495 g
