As leaders in optical performance and ergonomics, the optical features of the KITE LYNX HD+ range are truly unique and the result of cutting-edge engineering.

DESCRIPTION

BEYOND LIMITS, BEYOND TRADITIONS - Lynx HD+

As leaders in optical performance and ergonomics, the optical features of the KITE LYNX HD+ range are truly unique and the result of cutting-edge engineering. This instrument is designed to provide perfectly natural color rendering and a wide-angle observation that no other pair of binoculars can match.

This exceptional wide-angle vision will allow you to make faster observations and identifications while also improving viewing comfort and image quality.

Thanks to the revolutionary optical system created by Kite optics, the LYNX HD+ range is designed to be adaptable to all conditions. This instrument exceeds the limits of any other pair of binoculars and gives you a huge advantage for long and short-distance observation. You will see faster at long distances thanks to its extra-wide field of view, and you will also observe an increased amount of detail when observing at shorter distances or in denser areas, such as forests or closed environments. You will therefore have a quicker view and a better consideration of details.

The LYNX HD+ is truly amazing because, despite all its optical technology, it is among the smallest and lightest binoculars ever made. The LYNX HD+ 30mm is so compact that it fits into the pocket of your vest.

The LYNX HD+ 50 mm, designed for optimal brightness performance, is neither larger nor heavier than most 42 mm binoculars on the market and offers an equally wide field of view. For the first time, you can enjoy the brightness achieved with large diameter binoculars without the traditional drawbacks such as weight, size, and a reduced field of view.

The LYNX HD+ truly transcends limits and even traditions.

- Extra wide field of view
- Ultra lightweight
- Ultra compact
- Neutral color rendering
- HD optical system
- KITE PERMAVISION (external lens coating for better water and dirt resistance)
- KITE PERMARESIST (improved scratch resistance)
- Removable and replaceable aluminum eyecups
- KITE MHR Advance + coating
- Fully waterproof and nitrogen-filled
- Delivered with strap, case, and lens covers

CONCEPT-TERRAIN

Preparing your binoculars

Before each delivery, your binoculars undergo a **complete optical and mechanical check** by us — to guarantee you a perfectly adjusted instrument, ready for use from the first use.

To enhance your experience in the field, we add a selection of **essential accessories for free:**

- Installation of the strap — **Smart-O'Strap**© system
- Installation of the **comfort attachment** for the eyepiece
- Installation of our **anti-slip system** for the lens covers — an exclusive innovation

TECHNICAL SPECIFICATIONS

Magnification	10x
Diameter	42 mm
Light transmission	88.5%

Brightness	4.2 lg
Field of view at 1000 meters	122 m
Minimum focus	1.8 m
Eyepiece relief	17.5 mm
Pupil distance (mm)	73-55 mm
Height & width	140x128 mm
Weight	700 g
