Step into a world where darkness is no longer an obstacle. The CERVUS HD stands out with exceptional light transmission, revealing its full potential when light is lacking. The result of innovative design, it excels where other optics reach their limits.

DESCRIPTION

FOR ALL LIGHT CONDITIONS

Expect the best possible light transmission. The Cervus HD has been specially designed for low light and darkness. The Cervus HD 8X56 remains effective where no other pair of binoculars works. The instrument is equipped with HD glass and KITE's MHR Advance + coating system, allowing these large diameter binoculars to transmit maximum brightness from dusk until dawn. Thanks to the combination of magnesium and aluminum, the Cervus HD remains very lightweight for 56 mm. Place your thumbs in the designed recesses and feel the perfect balance of the instrument in your hands. The chassis elements are designed to provide better grip and greater comfort, allowing for a more comfortable view regardless of duration.

- Ergonomic and comfortable design
- Durable rubber with a special texture for better grip
- Bright HD optical system
- KITE PERMAVISION

- KITE PERMARÉSISTANT
- Aluminum eyecups, removable for cleaning
- Twist-up eyecup with 3 positions
- KITE MHR Advance + coating
- Fully waterproof and nitrogen-filled
- Delivered with strap, case, and lens covers

REFINED BRIGHTNESS

Experience the excellence of the optical performance of the Cervus HD. With a remarkable light transmission of 94%, every detail is reproduced with exceptional clarity, from the center to the edges. The HD optical system and KITE's MHR Advance+ treatment ensure a remarkable visual experience, regardless of lighting conditions.

ERGONOMICALLY DESIGNED

The Cervus HD, made of magnesium and aluminum, features a design that combines form and functionality. With precisely designed thumb impressions, it rests naturally in the hand and ensures a smooth and comfortable observation experience.

CONCEPT-TERRAIN

Preparation of your binoculars

Before each delivery, your binoculars undergo a **complete optical and mechanical check** by us — to guarantee you a perfectly adjusted instrument, ready to use from the first use.

To enhance your experience in the field, we add a selection of **essential accessories for free**:

- Attachment of the strap — **Smart-O'Strap**© system
- Attachment of the **comfort connector** for the eyecup
- Attachment of our **anti-slip system** for the lens covers — an exclusive innovation

TECHNICAL SPECIFICATIONS

Magnification	8x
Diameter	56 mm
Light transmission	94%
Brightness	7.0 lg
Field of view at 1000 meters	128 m

Minimum focus	2.6 m
Eyepiece relief	20 mm
Pupil distance (mm)	76-56 mm
Height & width	192x157 mm
Weight	1,198 g
