Item ref. (SKU)	57108

High-quality aplanatic field magnifier.

DESCRIPTION

Botanic LED-UV magnifier 15x 21mm

Aplanatic glass magnifier with metal frame and chrome cover
The Botanic LED-UV magnifier is suitable for close inspection of plants and insects as well as for reading small print documents.

The optics consist of 3 elements; made of glass and fully multi-coated for optimal resolution.

Equipped with 6 LEDs, this model provides effective lighting in low light conditions. An additional UV light source allows for the visualization of the fluorescent properties of stamps, banknotes, flora, and fauna.
