Omegon ED Flatfield eyepieces - Flat field and high contrast.

DESCRIPTION

Omegon Flatfield ED 8.0 mm (31.7 MM)

Omegon ED Flatfield eyepieces - Flat field and high contrast

Most eyepieces cause image distortion at the edge of the field of view. Distortion occurs when you move the object towards the peripheral areas of the field. However, this effect is minimized by Omegon's ED Flatfield eyepieces. Have you ever dreamed of obtaining a distortion-free image that is very close to reality?

Well, with the Flatfield eyepieces, you won't be far from that ideal vision. The Flatfield eyepieces feature an ED lens element that provides colors of very high purity. Thanks to their optical formula, these eyepieces offer contrast and sharpness values that are well above the usual level.

The advantages at a glance:

- Flat field thanks to the Flatfield optical system
- ED element ensuring high contrast and pure colors
- Wide-angle eyepiece - 60° field of view
- Great viewing comfort
- Multi-layer coating on all surfaces

-
- Eye relief of 16 mm - ideal for eyeglass wearers
 - Adjustable rigid eyecup by screwing
 - Barrel diameter of 31.75 mm and filter thread for 31.75 mm

Large field of view

With their apparent field of 60°, these eyepieces belong to the wide-angle category. It is true that classic eyepieces - providing a
