Item ref. (SKU)

BAA870WC

Binoculars from NIKON SWITZERLAND. Take in the whole spectacle of the world while traveling in style with the ACULON T02 binoculars.

DESCRIPTION

An ergonomic zoom control located on the top of the housing makes it easy to operate the zoom, while the entire lens and prism system benefits from a multi-coating treatment to provide brighter images. Always be in the front row. Available in dark blue, white, and black.

Simple and quick zoom

See exactly what you want to see with a zoom of 8 to 24x. The zoom control is easy to reach on top of the binoculars, allowing you to follow the action while activating it. The zoom in or out is smooth, from 8x to 24x. With no fixed magnification stops, you can easily spot and follow your subject, feeling as if you are right there on the field or on stage beside it. The mechanical zoom does not require batteries, so you can use your binoculars at any time.

Fully experience the moment

Watch sporting feats or the action of a music festival in clear detail, ensuring you never miss a second of your favorite teams or artists. The entire lens and prism system benefits from a multi-coating treatment for bright images. Combined with the zoom capability, this means you will be everywhere in the front row. The rubber eyecups allow for easy positioning of the eyes and enhance viewing comfort.

Comfortable carry

With a lens diameter of 25 mm and a weight of only 305 g, these sleek binoculars feature a compact, lightweight, and comfortable housing. You can carry and handle them with ease, even during long days of sporting events, shows, or concerts.
