A captivating design from every angle. Compact, lightweight, and remarkably elegant — every element of the tripod exudes a finesse and quality of craftsmanship that is noticeable at first glance.

DESCRIPTION

In short:

- 4-section carbon tripod **with 10 layers**
- Central column angle adjustment system
- Semi-automatic angle stop
- Tripod leg locking mechanism, in just ¼ turn

Tripod with integrated ball

This model features an integrated hollow ball, which completely eliminates the limitation of the straight central column and can move and adjust the angle as freely as a ball head. The stability of observation with binoculars or a spotting scope starts with a rock-solid tripod. With its lightweight and versatile stability, the Forest tripod will become the new standard for outdoor tripods.

Central control locking system

Rue du Perron 17
1204 Genève
022 311 47 75

The central control locking system offers a good hand feel. Faster locking system that only requires a half turn.

An excellent idea is easy to recognize.
