SP 56 Small in size. Big in experience

DESCRIPTION

SMALL IN SIZE. BIG IN EXPERIENCE

The KITE OPTICS SP 56 is designed for those seeking true optical performance in the most compact format possible. Ultra-compact, lightweight, and perfectly balanced, it is the ideal companion for travel, nature walks, and spontaneous observation, anytime and anywhere.

ULTRA-COMPACT & ULTRA-LIGHT

At only 25 cm in length and weighing 700 grams, the SP 56 is remarkably compact for a true spotting scope. It easily fits into a backpack or day bag, making it the ideal “grab & go” telescope for hikers, travelers, and families. Uncompromised freedom of movement.

ANGLED OBSERVATION COMFORT FOR ALL

The angled eyepiece offers natural and relaxed observation in all situations – sitting, standing, or sharing the view with others. The SP 56 is thus particularly comfortable for both adults and children, and perfect for effortless and fatigue-free observation.

ERGONOMIC, WATERPROOF & DESIGNED FOR REAL LIFE

The ergonomic focus allows for quick and precise one-handed operation, while the fully waterproof construction ensures reliability in all weather conditions. From seaside strolls to hikes in the rain, the SP 56 is ready wherever you are.

ZOOM 12-36X

The integrated 12-36x zoom eyepiece allows for a smooth transition from a wide overview to detailed observation. Despite its compact format, the SP 56 offers impressive sharpness and natural color reproduction, enhanced by KITE's MHR coating for high contrast and clarity. A small instrument with an surprisingly large image.
