Discover the new compact Frontier ED X 8x25 binoculars from HK Optics — our most advanced compact model to date.

DESCRIPTION

Designed for those seeking top-notch performance in a pocket-sized format, the Frontier ED X offers remarkable clarity and colors, wherever your adventures take you.

Thanks to the extra-low dispersion (ED) glass, fully multi-coated optics, and dielectric coatings on the prisms, you benefit from bright, sharp images with exceptional light transmission. The double-hinge body makes them ultra-compact — small enough to fit in a jacket pocket — while the magnesium alloy chassis keeps them lightweight and robust.

These binoculars also feature twist-up eyecups, a waterproof and fog-proof design, and come with a case, strap, and protective caps. Whether you’re traveling light or simply seeking serious performance in a compact format, the Frontier ED X binoculars are ready for the challenge.

- Extra-low dispersion (ED) glass
- Dielectric mirror coating
- High-resolution BAK-4 roof prisms with phase correction
- Hydrophobic coating on the lenses
- Magnesium alloy chassis

Rue du Perron 17
1204 Genève
