Availability	**Out of stock**
Item ref. (SKU)	56201

Get closer to the action with the Endurance ED spotting scopes — exceptional optical performance combined with unbeatable robustness.

DESCRIPTION

The Endurance ED spotting scopes offer the performance needed to get close to the action, with the robustness you demand.

All magnifications are built with ED glass that reduces chromatic aberrations. The ED glass controls color fringing and enhances image clarity and sharpness — highly recommended by nature enthusiasts.

All lenses are fully multi-coated and the prisms feature a dielectric coating for increased reflectivity. The Endurance spotting scopes are equipped with a dual focus wheel (coarse and fine), 3x eyepieces with rotating eyecups, and retractable sunshades.

Choose from a range of large-format spotting scopes with 85 mm or 68 mm objectives, or opt for the compact design with 60 mm objectives.

All spotting scopes come with protective caps and custom soft cases.

- Ultra-compact and lightweight construction
- Extra-low dispersion (ED) glass for optimal clarity
- Dielectric coating designed to increase light reflectivity

Rue du Perron 17
1204 Genève
022 311 47 75

- Fully multi-coated optics for sharp and precise images
- Close focus — details visible from 5.0 m
- BAK-4 Porro prisms for intense colors and high contrast
- Dual focus wheel for ultra-fine adjustment
- Custom soft case for maximum protection
- Rotating eyecup and retractable sunshade
- Digiscoping compatible for use with your smartphone

TECHNICAL SPECIFICATIONS

Diameter	**68 mm**
Oculaire inclus	**Yes**
Magnification	**20-60x**
Field of view at 1000 meters	**36 - 20 m**
Minimum focus	**5.0 m**
Brightness	**3.4 - 1.1**
Eyepiece relief	**20.0 mm**
Height & width	**Length 405 mm**
Weight	**1495 g**
