A companion for exploration that fits in your pocket: the Gallery Scope 8x20 invites you to discover the world differently, from the details of a painting to the wonders of nature. Paired with the Microstand 3x LED, it reveals an unsuspected miniature universe — plants, insects, small treasures of everyday life. An endearing duo, equally at home on a walk or at home.

DESCRIPTION

Portable Microscope Kit

Field kit consisting of two elements

Gallery Scope 8x20

Named in honor of art students, the Gallery Scope 8x20 monocular is an ideal tool for close study of paintings and macro observation of wildlife, while being a practical field monocular that slips discreetly into a pocket or backpack.

Featuring a Japanese roof prism optical system, the Gallery Scope 8x20 delivers sharp and precise images with a field of view of 7.0°. The focus from 15 m to infinity requires only minimal adjustment. By fully unscrewing the focus knob, you achieve a close focus at 30 cm, ideal for detailed observation of all kinds of plants and animals.

Microstand 3x LED

The Opticron Microstand 3x LED connects to Gallery Scope monoculars to transform them into compact tabletop microscopes, allowing close observation of plants, insects, and other small objects.

Features

- 24x microscope with the LED microstand
- Secure screw attachment on the body of the Gallery Scope
- Multiplies the magnification of the Gallery Scope by 3
- Object positioning surface: 62 x 55 mm
- Detachable and adjustable LED light source — lithium CR2016 batteries included (16 hours of continuous use)
- Ultra-compact design with roof prisms, metallic black finish
- Fully multi-coated optical system (all glass/air surfaces)
- Macro focus at 30 cm for the Gallery Scope

Included accessories

- The Gallery Scope monocular comes with a soft case, strap, and protective caps.
- The Microstand 3x LED comes with its detachable LED illuminator.
