Item ref. (SKU)	BC-04

Securely attach your binoculars to a tripod and enjoy stable and comfortable viewing, even during long sessions.

DESCRIPTION

Tripod adapter for binoculars

The BC-04 is an adapter that allows you to securely attach your binoculars to a tripod. It provides a stable platform for different sizes of binoculars, ensuring comfortable and vibration-free observation, especially during long viewing sessions. Made from robust and durable material, it is ideal for nature observation and birdwatching.

Its large support of nearly 100 x 50 mm ensures stable support for binoculars weighing up to about 1.5 kg, while the wide strap securely holds the binoculars on the support.

The platform is compatible with all Arca-Swiss tripod heads and features a 1/4" and 3/8" thread. Rotating 360°, it allows for easy orientation of the binoculars without having to reposition the entire tripod.

For the metal parts, Leofoto uses the high-quality aluminum alloy 6061-T6, composed of magnesium and silicon. This corrosion-resistant material is distinguished by its high mechanical strength and good toughness.

Its yield strength is comparable to that of construction steel. All parts are machined from solid material on state-of-the-art CNC machines, making them significantly stronger than cast parts. Here too, Leofoto makes no compromises!
