Enjoy premium optics in a lightweight, robust design ready to accompany you across all terrains

DESCRIPTION

Exceptional optical quality in a robust design, built for all your adventures.

The compact Hawke Frontier ED X 15–35x56 combines premium optics with a robust, travel-ready design. Its extra-low dispersion (ED) glass, lanthanum ocular elements, and BAK-4 roof prism with phase correction provide exceptional clarity, color fidelity, and edge-to-edge sharpness, further enhanced by super wide-angle optics and a flat field.

A fully multi-coated broadband optical system ensures bright, high-contrast images even in challenging lighting conditions. Designed for quick and intuitive use, it features a smooth focus ring and a comfortable rotating eyecup.

- **ED glass (Extra-Low Dispersion)** for exceptional sharpness and reduced chromatic aberrations
- **Wide-angle optics** for an expanded field of view and optimal immersion
- **Lanthanum ocular lens** providing a brighter, sharper, and better-corrected image
- **BAK-4 roof prism with phase correction** for high contrast and true color reproduction
- **Fully multi-coated broadband optical system** for maximum light transmission
- **Focus ring on the body** for precise and quick adjustments

Rue du Perron 17
1204 Genève
022 311 47 75

- **Rotating eyecup (Twist-Up)** for optimal viewing comfort, with or without glasses
- **1/4"-20 UNC thread** compatible with most tripods
- **Lightweight and compact construction**, ideal for transport and field observations

TECHNICAL SPECIFICATIONS

Diameter	**56 mm**
Oculaire inclus	**Yes**
Magnification	**15-35x**
Field of view at 1000 meters	**70 - 36.7 m**
Minimum focus	**4.0 m**
Brightness	**3.7 - 1.6**
Eyepiece relief	**18.0 mm**
Height & width	**Length 265 mm**
Weight	**1005 g**
