Practical magnifiers for everyday use. Monoculars are versatile and compact, fitting into a pocket or handbag and can complement binoculars by tripling their magnification for detailed observation. They are ideal for sporting events, theatre, and outdoor activities, allowing users to see even the smallest details.

DESCRIPTION

Always available

Small, lightweight and sporty, compact monoculars are practical for excursions in nature, concerts or sporting events. They bring objects within reach at the speed of light, allowing you to distinguish even the smallest details. Diopter adjustment is possible up to +|- 4 diopters.

ZEISS T* coating

The ZEISS T* coating guarantees bright, high-contrast images that you will experience especially in unfavorable low-light conditions and at dusk. However, there is no specific formula for developing the layers. Instead, it is a constantly adjusted technology to meet the new glass materials and the varying requirements from one lens to another.

Short range

Thanks to their close focusing capabilities, the Mono 4x12 T* and 6x18 T* models are suitable for use as a magnifier or visual aid. They are therefore very versatile. Whether you are observing butterflies, consulting
