The compact and lightweight spotting scope for detailed bird observation. The compact and lightweight ZEISS Conquest Apia 65 allows for precise observation of nature and birds. Thanks to its high-quality HD optics, optimized zoom (20–50×), and high light transmission, even the smallest details are visible. Robust and versatile, it is ideal for experiencing intense moments in nature.

DESCRIPTION

The ZEISS Conquest Apia 65 is the ideal spotting scope for nature and birdwatching enthusiasts who want to combine lightweight and compact design with exceptional optical performance while on the move. It is a reliable companion for long observation outings. Thanks to its HD optical concept, it provides sharp and highly contrasted images across the entire field of view, and its zoom range of 20 to 50x allows you to appreciate both an overview and the finest details.

Compact and lightweight

The mechanical design is optimized to provide great stability while minimizing weight, ensuring excellent maneuverability. Thanks to the optimized lens arrangement, the device stands out with a compact design. A robust rubber coating ensures a secure grip, even in difficult conditions. Additionally, the LotuTec® coating repels water and dirt, enhancing the durability and reliability of the device.

High-end ZEISS optics with HD concept

Rue du Perron 17

The ZEISS Apia binoculars offer clear vision in low light conditions thanks to a light transmission of 87%, made possible by the ZEISS T* coating. They are distinguished by exceptional sharpness from edge to edge, achieved through ZEISS FieldFlattener technology, and minimize chromatic aberrations through the use of ED glass and aspherical lenses. With a magnification range of 20 to 50x, they provide flexible observation distances for an immersive and relaxed experience.

Ergonomic design

With the ZEISS Apia spotting scope, you benefit from precise and quick focusing, making it particularly suitable for moving targets. The focus wheel is designed for optimal hand positioning, ensuring comfortable use. The large focus and zoom wheels ensure reliable operation, while the balanced weight distribution provides great stability during observations, whether the device is mounted on a tripod or used handheld.

Matching accessories for maximum flexibility

The ZEISS Apia spotting scope comes with several practical accessories, including a maneuvering lever that allows you to effortlessly adjust the zoom and focus with one hand. An Arca-Swiss compatible tripod plate makes it easy to attach to standard tripods.

ZEISS T* coating

The ZEISS T* coating guarantees bright images with high contrast that you will experience especially in unfavorable low light conditions and at dusk. However, there is no specific formula for developing the layers. Instead, it is a constantly adjusted technology to meet the new glass materials and the varying requirements from one lens to another.

TECHNICAL SPECIFICATIONS

Diameter	**65 mm**
Oculaire inclus	**Yes**
Magnification	**20-50x**
Field of view at 1000 meters	**48 – 27 m**
Minimum focus	**3.5 m**
Light transmission	**87%**
Brightness	**3.2 – 1.2**
Eyepiece relief	**18 - 20.0 mm**
Height & width	**299 mm (length)**
