Precise, elegant, high-performing – designed to fit in all pockets

DESCRIPTION

The Leica Monovid 8x25 is elegant, ultra-compact and always at hand when you need it – whether in the city, at the theatre or in nature. With its 8x magnification, it explores the smallest details of historic facades and gets up close to the artists performing on stage. Lightweight and sleek, the Monovid can disappear in the blink of an eye at the bottom of your pocket. Particularly practical is the macro lens included in the package, which simply screws onto the objective. With it, objects located at 25 or 30 cm can be observed with incredible precision – ideal for exploring a public transport timetable or the refinement of a flower. Premium design, remarkable optics and timeless design make the Leica Monovid 8x25 a stylish companion for all occasions in life.

Main features

- Ultra-compact and elegant monocular
- Elegant leather coating for a refined touch
- 8x magnification for precise detail observation while on the move
- Crystal-clear and contrasted optics thanks to high-quality treatment
- With macro lens for close observation at a distance of 25 to 30 cm
- Fits in all pockets

Sleek design that fits anywhere

Rue du Perron 17
1204 Genève

The Leica Monovid 8x25 stands out with its sleek, extremely compact design, making it a discreet companion on every occasion. Its lightweight and elegant lines allow it to easily find a place in a jacket pocket, a backpack, and even a small handbag. Despite its minimalist appearance, it ensures absolute functionality – perfect for all mobile activities, without overloading or drawing attention.

Choice touch and timeless elegance

The Leica Monovid 8x25 is adorned with a diamond-patterned leather covering that is particularly stylish, which it shares with the brand's legendary camera bodies. Exclusive materials and precision design give this monocular a discreet and timeless elegance. The refinement of the leather ensures a very pleasant touch, but also special robustness and durability for everyday use.

Crystal-clear images, every moment

The Leica Monovid 8x25 ensures clear visibility, no matter the light. The 25 mm objective provides clear and contrasted images, with impressive detail fidelity. Thanks to the highly sophisticated treatments and the precision of the optical system, colors are natural while sharpness and contrasts are particularly vivid, allowing subjects – from nature to architecture – to be observed without constraint and in absolute comfort.

Experience the smallest details in large

The macro lens that accompanies the Leica Monovid 8x25 opens up additional perspectives: subjects located 25-30 cm from the objective can be observed with impeccable sharpness, similar to a magnifier. This way, the most discreet structures of a flower, a work of art, or a stamp are revealed effortlessly and even at very short distances. Particularly useful both in the city, at the theatre, or in the garden, it allows for spontaneous close observations. Combined with the 8x magnification, it preserves the stability and brightness of the image.
