

Sky-Watcher DUAL LED flashlight

29,00 CHF

VAT included

Availability

Available in Geneva

Item ref. (SKU)

20741

Red and white flashlight.

DESCRIPTION

DUAL LED flashlight

Main features include:

- Adjustable brightness
- Red and white LED light
- Ergonomic grip with cord
- 9V battery included

Sky-Watcher flashlight with red light for reading maps at night and using the telescope. The red light does not disturb the eyes' adaptation to night vision. Additionally, the lamp can be turned on in white light and used as a regular flashlight. Brightness is adjustable.
